The two major student organizations at any college or university are the Student Union and the Student Senate. These organizations are responsible for the academic and social life of the student community. The Student Union typically focuses on providing a variety of social and entertainment events, while the Student Senate is more involved in governance and the representation of student interests to the administration.

At Bryan College, the Student Senate is the governing body of the student body. The Senate is made up of students from each of the four classes, one non-resident student, and civil life of students and the student union for the social, athletic, and religious bodies. The Senate provides a forum for the discussion of student concerns, and its decisions are made through a process of discussion and decision-making.

The Student Union, on the other hand, is responsible for providing a variety of extracurricular activities, such as clubs, sports teams, and social events. The Student Union also plays a role in the planning and development of the campus.

Both organizations work closely together to ensure that the needs and interests of the student body are met. They are responsible for the planning and execution of a variety of events, such as Sadie Hawkins Day and Hobo Day.

The Student Senate meets at least once each week to provide leadership in planning and development stages of the new Student Center. It is the Senate's role to represent the student body to the administration and to the community at large.
